¿CÓMO BUSCAR ?

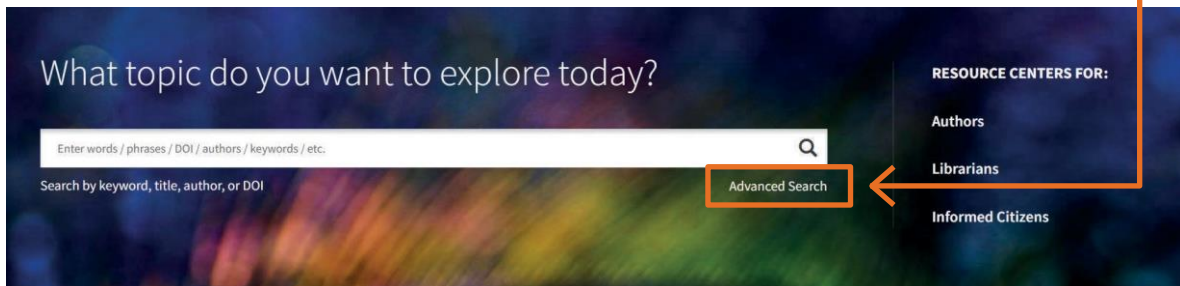

1

Introduzca sus términos de búsqueda, palabras clave, autor o título del artículo.

# BÚSQUEDA AVANZADA

- 1** Para una búsqueda avanzada, seleccione la opción marcada abajo de la barra de búsqueda "Advanced search"

- 2** Seleccione los filtros que desee utilizar y realice su búsqueda.

Home / Advanced Search

## Advanced Search

Enter one or more search criteria below. Boolean AND, OR and NOT are supported (e.g. higgs AND boson). Use quotation marks (" ") to find an exact phrase (e.g. "baryon decay"). Use asterisks to match partial words in fields (e.g. neutron\*).

Enter Keywords/Phrases  in

# CÓMO ENCONTRAR

1

Localice el artículo que le interesa.

The screenshot shows the Annual Reviews website search results for the query "medicine". The page features a dark blue header with the Annual Reviews logo, navigation links for "Publications A-Z" and "Journal Information", and utility links for "About", "Subscribe", and "Give". A search bar is located in the top right corner. Below the header, the search results are displayed, showing "RESULTS: 1 - 20 of 17,029 for 'medicine'". A "Modify this search" button is on the left, and "Next action" and "Sort By: Relevance" options are on the right. A list of search results is shown, with two items highlighted in yellow: "Environmental Medicine" and "Hyperbaric Medicine". The "Environmental Medicine" entry includes the source "Annual Review of Medicine 10, pp. 389 - 402 (1959)", the date "Feb 1959", and the authors "Robert A. Kehoe, Lee H. Miller, Alvin Davis...". The "Hyperbaric Medicine" entry includes the source "Annual Review of Medicine 16, pp. 253 - 262 (1965)", the date "Feb 1965", and the authors "H A Saltzman, and I W Brown Jr". To the right of the search results, there are two promotional banners: "Read the latest from Knowable Magazine" and "Climate Resource Center".

### ABSTRACT

In the era of precision medicine, time-to-event outcomes such as time to death or progression are often collected, along with high-throughput covariates. These high-dimensional data defy classical regression models, which are either infeasible to fit or likely to incur low predictability due to overfitting. To overcome this, recent emphasis has been placed on developing novel approaches for feature selection and model building.
